

# UBC Pathway

$x_7$  is a Child node of  $x_8$

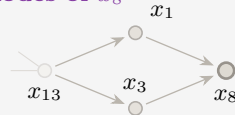

A node's child node directly reachable via a single directed edge.

$x_1, x_3, x_9$  are Parent nodes of  $x_8$

A node is directly reachable from its parents via a single directed edge.

$x_1, x_3, x_{13}, \dots$  are Ancestor nodes of  $x_8$

A node is reachable from any of its ancestors via a series of directed edge.
